

RM-WCH-8 Firmware Update Instructions

■ Summary

After pairing the charger and access point for which operator wants to update the firmware, update the charger firmware, which is bundled in the access point firmware, to the charger over the air.

[1] Log in to the Web-GUI of the access point using "RM Device Finder"

- [2] Pair the access point and charger
- [3] Update Charger firmware from Web-GUI
- [4] Unpair the access point and charger

■ Advanced Requirements

- 1 x Windows PC with wired ethernet connector
- 1 x PoE network switch
- LAN cable (CAT5e or higher)
- PC application "RM Device Finder"
- RM-WAP-8 (uploaded new firmware)

[Procedure for Logging in the Access Point's Web-GUI]

1. Execute RM Device Finder.exe and search for access points.

Double-clicking the Web-GUI icon of the access point to be paired with the charger from the listed access points displays the Web-GUI login screen. In that case, please confirm that the version of the access point is 1.8.2.

[Firmware Update Procedure]

1. Click the "TURN ON FWU MODE" button on the TOOLS>UPDATE page.

Click this button to change to firmware update only mode and stop audio communication between the access point and the microphone. When the firmware update is completed, click the "TURN OFF FWU MODE" button to release the dedicated mode.

| | | | | | | |

Charger update will start. Only chargers that need updating will be updated. The charger has two types of firmware, the charger firmware is written first (approximately 1 minute 30 seconds), and then the microphone firmware is written (approximately 2 minutes 30 seconds). If multiple chargers are paired, write the charger firmware to all chargers before writing the microphone firmware.

■ Summary

According to the RM-WCH-8 firmware update procedure to update the RM-WCH-8 to the latest firmware. If operator pus the microphone on the charger, the upgrade will start.

[Procedure]

1. Place the microphones on the charger in order from the first port.

Up to 8 microphones can be used at one time. Firmware updates are executed in order from 1 to 8. It takes about 1 minute per unit.

2. Wait for the firmware update of the last placed microphone to complete. After confirming the completion of the last microphone firmware update, return to 1) and perform the next firmware update.

Operator can check the status of the firmware update on the microphone itself with the MIC indicator. If the update completion cannot be confirmed by the microphone indicator, place the microphone on the charger again and check that the update does not start.
